CTCSS TONE PROTECTION

Radio System Interference

Interference to CAL FIRE Local Net communications has become increasingly common, the planned re-use of CAL FIRE assigned radio frequencies, FCC authorized frequency assignment, and antenna improvements made at various CAL FIRE remote radio sites:

- Local Net radio frequencies have been re-utilized to create additional Command Nets. This was accomplished to increase radio system efficiency and relieve Command Net congestion. Re-use of radio frequencies, however, can cause interference to existing Local Net assignments.
- CAL FIRE radio frequencies are not assigned exclusively to our Department. Federal Communications Commission (FCC) rules also authorize use of these radio channels to other local government “forestry-conservation” agencies. These users can also create interference to CAL FIRE radio nets.
- Improved antenna towers and associated radio and antenna systems at CAL FIRE remote radio sites have improved local area radio coverage. However, coverage may be extended unintentionally to other co-channel Units with resultant interference.

Continuous Tone Coded Squelch System (CTCSS)

A method for elimination of co-channel, public safety radio system interference is the activation of Continuous Tone Coded Squelch System (CTCSS) protection. CTCSS protection is built into modern radio equipment. Several years ago, CAL FIRE converted the mountain top mobile relay selection from “burst-tone” to CTCSS.

Note: References are occasionally made to “PL” as a tone protection system. “PL” refers to “Private Line,” which is the trade name reference to the CTCSS feature provided in radio equipment manufactured by Motorola Corporation.

Recent purchases of CAL FIRE replacement radio equipment have provided the opportunity to enable CTCSS protection throughout our radio system. Basic elements of CTCSS implementation will include protection of all radio equipment:

- Each Local Net has been assigned a discrete CTCSS “tone.” Mobile relays within the Local Net continuously transmit the specified CTCSS tone.
- Radio receivers within each Local Net are CTCSS “protected” so that the receiver will not “open” unless it detects the assigned CTCSS tone. All receivers are protected; ECC control stations, FFS, AAB, and Conservation Camp base stations, all mobile radios, all HTs and all aircraft and helicopter radios.
- An example of CTCSS protection is illustrated by examination of the BTU Local Net and the co-channel (151.400/159.375 MHz) CAL FIRE Command-4 Net, which is operating in Central California.

- 1) BTU ECC radio receivers will be protected by CTCSS "Tone-1."
- 2) BTU mobile relays will always transmit CTCSS "Tone-1."
- 3) BTU ECC Local Net will only hear radio traffic from their mobile relays.
(See also CTCSS Limitations)
- 4) BTU ECC Local Net will not hear the interfering radio traffic from Command-4, because that radio system transmits CTCSS "Tone-8"

Similar CTCSS tone assignments are planned and activated to eliminate other CAL FIRE co-channel interference situations. System planning and engineering will be completed to ensure that existing and future co-channel radio systems are assigned different CTCSS tones.

CTCSS protection is commonly used, worldwide, for control/protection of commercial and public safety radio systems.

CTCSS Tone Plans

CAL FIRE CTCSS tone protection plans will be published in the CAL FIRE Radio Call Plan, as issued to all CAL FIRE radio users. CAL FIRE Telecommunications staff also provides a radio channel summary to the Aviation Management Unit, North/South Operations Coordination Centers, and Unit Emergency Command Centers for distribution to agency, cooperator, and vendor aircraft operators.

With exception of HUU and AEU, the assigned CTCSS tone is the same number as the second digit of the Unit designator.

Example:

- TGU unit designation is "2500," which equates to CTCSS "Tone-5" (146.2Hz)
 - CZU unit designation is "1700," which equates to CTCSS "Tone-7" (167.9Hz)
- Exception to standard CTCSS assignments:
- HUU unit designation is "1200" assigned CTCSS is "Tone-1" (110.9Hz)
 - AEU unit designation is "2700", assigned CTCSS is "Tone-5" (146.2Hz)

CDF Command Nets 1 through 12 have been assigned "Tone-8" (103.5Hz) on the receive side statewide. This assignment will provide protection from co-channel CAL FIRE Local Nets. CDF Command 11 will be assigned to INCIDENT portable repeaters with OST. It will not be pre-assigned.

CDF Tactical Channels are CTCSS protected with Tone-17 (67.0) and Tone-16 (192.8) on transmit and receive.

CTCSS Limitations – Car-to-Car (direct) Communications

CTCSS protection for a specific Local Net includes activation of CTCSS tone decoding for all mobile radios. Car-to-Car (direct) communications requires that the assigned Unit CTCSS tone be transmitted to “open” the mobile receiver. The Kenwood and the Relm mobile radios are programmed to automatically select the proper CTCSS tone in the “TA” (talk around) transmit mode.

Out-of-Unit mobile radios and cooperators should use the mobile relay system within each Unit, (if their radios are not programmed with the receive tone) as per the published Radio Call Plan.

CDF COMMAND NETS

CDF C1 and CDF C2 repeater systems are located statewide and are shown on the map on pages 89-90. CDF C3 – CDF C10 repeater systems are assigned to various locations throughout the state and are shown on pages 91-97. They are used as command frequencies for incident communications. These frequencies are available to ECCs for incident assignment, consistent with licensing and repeater deployment, in pre-approved areas of the state, with assignment by Region OCC. Use car-to-car “talk around” whenever possible.

Designator	RX Tone	Receive	Transmit	KNG M150/P150	KNG CH. #
				10	1
CDF C1	103.5	151.3550	159.3000	CDF C1	2
CDF C2	103.5	151.2650	159.3300	CDF C2	3
CDF C3	103.5	151.3400	159.3450	CDF C3	4
CDF C4	103.5	151.4000	159.3750	CDF C4	5
CDF C6	103.5	151.2500	159.3600	CDF C6	6
CDF C7	103.5	151.4600	159.3900	CDF C7	7
CDF C8	103.5	151.4450	159.3450	CDF C8	8
CDF C9	103.5	151.1750	159.4500	CDF C9	9
CDF C10	103.5	151.1900	159.2250	CDF C10	10
CDF C11	103.5	151.1675	159.3975	CDF C11	11
CDF C12	103.5	151.2425	159.2625	CDF C12	

LOCAL NET

This is usually the primary dispatch and operations net for each Unit. Most initial attack dispatching is done on the Local Net. Local Net is used for emergency traffic, aircraft-to-ECC communications, and routine administrative traffic when the net is clear. Repeater locations are shown on the Unit maps.

TACTICAL NETS

Tactical frequencies are assigned to specific Units to allow for incident on-scene radio communications. Their purpose is to provide each incident a different frequency(s) to minimize interference in multiple incident situations, and to free up the local net for its designated purposes. Tac Nets are used for communications on an incident between the Incident Commander and the resources assigned to that incident. ECCs will manage and assign Tac Nets.

CALIFORNIA TRAVEL NET (CESRS)

The Travel Net is a shared radio net under a formal agreement between Cal OES and CAL FIRE known as California Emergency Services Radio System (CESRS) in the KNG M150/P150 Statewide Zone 10 "CDF CMD/TAC".

Repeater Input 154.9800 MHz

Repeater Output 153.7550 MHz

Additional authorized use of CESRS is limited to ground resources travelling to/from an incident outside their home Unit. This channel will not be used as a tactical net, nor will it be used for routine administrative traffic. Authorized uses are:

- 1) Emergency vehicle-to-dispatch communications
- 2) Emergency vehicle-to-vehicle communications
- 3) Initial contact, recall and/or reassignment of personnel and equipment
- 4) Contact channel during long distance travel by overhead, strike team, etc.
The purpose of this channel is limited to ground resources enroute to/from an incident outside their home base, and not used for routine administrative traffic or a tactical net.

Contact should first be attempted by cell phone for traveling. Use CESRS in car-to-car "talk around" whenever possible.

CONTINUOUS TONE CODED SQUELCH SYSTEM (CTCSS)

CTCSS encoding provides continuous sub-audible tone to access mobile relays (repeaters) and provide access to receive tone protected radios.

CAL FIRE CTCSS TONES:

T1=110.9 Hz	T10=107.2 Hz	T18=71.9 Hz	T28=118.8 Hz
T2=123.0 Hz	T11=114.8 Hz	T19=74.4 Hz	T29=173.8 Hz
T3=131.8 Hz	T12=127.3 Hz	T20=77.0 Hz	T30=179.9 Hz
T4=136.5 Hz	T13=141.3 Hz	T21=79.7 Hz	T31=186.2 Hz
T5=146.2 Hz	T14=151.4 Hz	T22=82.5 Hz	T32=203.5 Hz
T6=156.7 Hz	T15=162.2 Hz	T23=85.4 Hz	
T7=167.9 Hz	T16=192.8 Hz	T24=88.5 Hz	
T8=103.5 Hz	T17=67.0 Hz	T25=91.5 Hz	
T9=100.0 Hz		T26=94.8 Hz	
		T27=97.4 Hz	

*NOTE: The above tones are the standard approved by CAL FIRE, FIREScope Communications, BLM, BIA, and the USFS within California.

AIRCRAFT COMMUNICATIONS

AIR TACTICS NETS

Air Tactics 4	151.2800 TX/RX Tone 1	CAL FIRE
Air Tactics 5	151.2950 TX/RX Tone 1	CAL FIRE
Air Tactics 6	151.3100 TX/RX Tone 1	CAL FIRE
Air Tactics 21	151.2725 TX/RX Tone 1	CAL FIRE
Air Tactics 22	151.2875 TX/RX Tone 1	CAL FIRE
Air Tactics 23	151.3025 TX/RX Tone 1	CAL FIRE
Air Tactics 24	151.3625 TX/RX Tone 1	CAL FIRE

The air operations frequencies are shared throughout California by CAL FIRE) and USFS. Communications on the air tactics net are restricted to air-to-air use. There are exceptions: CAL FIRE Helitack crews on CAL FIRE incidents may, with approval from the Air Tactical Supervisor, transmit on CAL FIRE Air Tactics 4, 5, 6, 21, 22, 23 or 24 (whichever is assigned) for necessary coordination with their own helicopter. No other ground units are authorized to transmit on the air tactics nets.

AIR GUARD (AIR SAFETY GUARD) 168.6250 MHz, TX Tone 1 (110.9)

This frequency is monitored (at all times) by all USFS, CAL FIRE and BLM aircraft and ECCs. Its use is restricted to aircraft, ECCs, Air Attack and Helitack Bases. This frequency is restricted to the following uses:

- 1) Air-to-air emergency contact and coordination
- 2) Ground-to-air emergency contact, including emergency hailing by crews in critical danger.
- 3) Initial call, recall, and re-direction of aircraft when no other contact frequency is available.

CAL FIRE VHF-AM RADIO FREQUENCIES

VHF-AM ("Victor") radio frequencies are available for incident use. These frequencies are shared throughout California by CAL FIRE and USFS. Due to FCC regulations and the need for close frequency management, use of these frequencies is prohibited without the approval of the Region Coordination Center. ECCs will place requests for VHF frequencies with the appropriate Region Coordination Center (North Ops or South Ops).

The following frequencies are authorized for CAL FIRE/USFS use:

VHF

122.850
122.900
123.975
122.975
123.025
122.750
122.925

FAA-FCC

Air to Air Operations
Air to Air Operations
Air Tanker Base Ground Control/Operations
Air to Air Operations Helicopter
Air to Air Operations Helicopter
Air to Air Operations
Air to Air Operations

The Region Coordination Centers may assign other VHF frequencies for specific incident support, depending on current FAA/FCC authorizations.

AIR-TO-GROUND COMMUNICATIONS

- Designated air-to-ground frequencies for use in California are:

151.2200 MHz	CDF Air to Ground 1	(Transmit/Receive Tone 16)
159.2625 MHz	CDF Air to Ground 2	(Transmit/Receive Tone 16)
159.3675 MHz	CDF Air to Ground 3	(Transmit/Receive Tone 16)
159.2250 MHz	CDF Air to Ground 4	(Transmit/Receive Tone 16)
159.2700 MHz	CDF Air to Ground 5	(Transmit/Receive Tone 16)
159.2850 MHz	CDF Air to Ground 6	(Transmit/Receive Tone 16)
159.3150 MHz	CDF Air to Ground 7	(Transmit/Receive Tone 16)
159.3450 MHz	CDF Air to Ground 8	(Transmit/Receive Tone 16)
159.3600 MHz	CDF Air to Ground 9	(Transmit/Receive Tone 16)
159.3750 MHz	CDF Air to Ground 10	(Transmit/Receive Tone 16)
159.3900 MHz	CDF Air to Ground 11	(Transmit/Receive Tone 16)
159.4050 MHz	CDF Air to Ground 12	(Transmit/Receive Tone 16)
159.4500 MHz	CDF Air to Ground 13	(Transmit/Receive Tone 16)
151.3325 MHz	CDF Air to Ground 14	(Transmit/Receive Tone 16)
159.2775 MHz	CDF Air to Ground 15	(Transmit/Receive Tone 16)
151.3775 MHz	CDF Air to Ground 16	(Transmit/Receive Tone 16)
167.6000 MHz	USFS AG-43	
166.8750 MHz	USFS AG-08	
167.5000 MHz	USFS AG-14	
169.1125 MHz	USFS AG-59	
167.4750 MHz	USFS AG-41	
168.6375 MHz	USFS AG-24	
168.4875 MHz	USFS AG-53	

USFS air-to-ground frequencies are assigned geographically.

- Normally, incident air-to-ground traffic is restricted to the Incident Commander (IC) and/or Operations Section Chief and Helitack crews. Individuals, crews, engines, and dozers needing air support should place their request with the IC, Ops, or other appropriate line officer on the assigned Tactical Net.
- CAL FIRE, USFS, and BLM contract aircraft, including air tankers, lead planes, air attack planes, smokejumper planes, and helicopters, can dial up any frequency between 150 and 174 MHz.
- CAL FIRE Call-When-Needed (CWN) air attack planes have limited frequencies. ECCs will assign the air-to-ground frequency to be used by CWN aircraft.
- ECCs are responsible for frequency management. Check with ECC if in doubt about an assigned frequency. Report serious interference to ECC ASAP.
- All CAL FIRE helicopters and air attack aircraft have tone encoders and can activate mobile relays when necessary.
- Incident Commanders should know which air-to-ground frequency is normally assigned for initial attack in their area. Unless the ECC advises otherwise, assume all aircraft will be monitoring this frequency.
- If you are unable to contact aircraft on assigned air-to-ground frequency, call ECC for assistance.
- Remember to talk to aircraft when they are off to one side. Directly overhead = No contact.

CLEAR TEXT WORDS AND PHRASES

Unreadable: Used when signal received is not clear. Try to add the specific trouble. Ex: "Unreadable, background noise."

Loud and clear: Self-explanatory.

Stop Transmitting: Self-explanatory.

Copy, copies: Used to acknowledge message received. Unit radio id must also be used. Ex: "Engine 2563, copies."

Affirmative: Yes

Negative: No

Respond, responding: Used during dispatch - proceed to or proceeding to an incident. Ex: "Engine 3365, respond...." or St. Helena, Engine 1475 responding."

Enroute: Normally used by administrative or staff personnel to designate destination. Enroute is not a substitute for responding.

In-quarters, with Station name or number: Used to indicate that a unit is in a station. Ex: "Oroville, Engine 2176 in-quarters, Jarbo Gap Station."

Uncovered: Indicates a unit is not in-service, because there are no personnel to operate it.

Out-of-service: Indicated a unit is mechanically out of service. When repairs have been completed the following phrase should be used: "Redding, Engine 2460, back-in-service, available."

In-service: This means that the unit is operating, not in response to a dispatch. Ex: "San Andreas, Engine 4460, in-service, fire prevention inspections."

Repeat: Self-explanatory.

Weather: Self-explanatory.

Return to _____: Normally used by ECC to direct units that are available to a station or other location.

What is your location: Self-explanatory.

Call _____ by phone: Self-explanatory.

Disregard last message: Self-explanatory.

Standby: Self-explanatory.

Vehicle registration check: Self-explanatory.

Is _____ available for a phone call?: Self-explanatory.

At Scene: Used when unit arrives at the scene of an incident.

Available: Used when a unit is ready for a new assignment or can return to quarters. The ECC will give the unit a new assignment or direct it to return to quarters.

Available at Scene: Used when a unit is still committed to an incident but could be dispatched to a new emergency if needed.

Available at Residence: Used by administrative or staff personnel to indicate they are available and on-call at their residence.

Can Handle: Used when the amount of equipment needed to handle the incident is at scene. Example: "San Luis, Battalion 3412, can handle with units at scene."

Burning Operation: Self-explanatory.

Report on Conditions: Self-explanatory.

Fire Under Control: Self-explanatory.

Emergency Traffic Only: Radio users will confine all radio traffic to an emergency in progress or a new incident. Radio traffic that includes status information such as responding.

Emergency Traffic: Term used to gain control of a radio frequency to report an emergency. All other radio users will refrain from using that frequency until cleared for use by an ECC.

Resume Normal Traffic: Self-explanatory.

PERSONNEL & EQUIPMENT CALL NUMBER INSTRUCTIONS

- Individuals having their own assigned radio number should use that number regardless of the type of radio unit they are using (base, mobile, HT).
- Individuals that do not have their own radio number and are using a vehicle assigned to someone else should use the vehicle radio id number with the prefix "Unit."
- Operators of engines, transports, supply vehicles, dozers, and dozer tenders will normally use the call number assigned to the vehicle.
- Whenever a hand-held radio ("handie-talkie") is used by an individual with a permanently assigned radio identifier, that person will continue to use his/her identifier. If the personal portable radio is assigned to a functional vehicle, the identifier for that radio will be the same as the vehicle, except that the letters "HT" will be inserted after the descriptive indicator. For example, Engine 2460 would be "HT 2460".
- When a Fire Crew Captain is working with a crew, use the appropriate crew number. Example: Ishi Crew 2
- CDCR camp vehicles, when utilizing CAL FIRE frequencies, will use the following clear text identifiers:
Example: Ishi Conservation Camp CDCR vehicles
Call sign "Ishi Corrections One", etc.
The operating procedures and frequency control are under the command of the local Unit ECC.

RADIO IDENTIFICATION PLAN FOR UNIT PERSONNEL AND EQUIPMENT

Standard radio identifiers will be used by all personnel using the CAL FIRE radio system. Radio identifiers consist of numbers or alpha-numeric combinations preceded by an appropriate descriptive indicator. If you do not have an assigned radio ID, please

contact your local Telecom representative to assist you in obtaining one. Descriptive indicators will be used statewide for both routine and emergency traffic. Radio identifiers will be used for all radio transmissions except when an individual or resource is assigned to a position on an incident using the Incident Command System (ICS). The individual or resource will then use the ICS radio call assigned to that position.

Indicator Resource

Admin	Administrative staff
Air Attack	Utility Aircraft
Air Recon	Utility Aircraft
Ambulance	BLS Staffed patient transport unit
Battalion	Battalion Chief
Boat	Self-descriptive
Chief	Unit Chief, Staff Chief, or Deputy Chief
Comm Unit	Communications Unit
Communications	Telecommunications Personnel
Copter	Helicopter
Crash	Specialized Airport fire protection
Crew	Fire crew
Emergency Crew Transport	Crew bus or Conservation Camp Vehicle (ECT)
Dispatch	Emergency Command Center Personnel
Division	Assistant Chief or Forester II
Dozer	Bulldozer
Dozer Tender	Bulldozer Service Unit
Engine	Fire Engine Pumper, 50 GPM minimum
Engineering	Construction & Maintenance Personnel
FDU	Food Dispensing Unit
Forester	Resource Management Personnel
Helitack	Helicopter Crew
Helitanker	A fixed tank helicopter with a 1,100 gal minimum capacity
Helitender	Helicopter Service Unit
MCC	Mobile Communication Center
Medic	Paramedic staffed ambulance
Medic Engine	Paramedic staffed engine
Medic Truck	Paramedic staffed truck
Medic Squad	Paramedic staffed rescue squad
MKU	Mobile Kitchen Unit
Patrol Pick-up	Pumper, 15 GPM minimum
Prevention	Fire Prevention Personnel and equipment
Repair	Equipment maintenance personnel and equipment
Squad	Vehicles equipped to support rescue and extrication
Supply	Material Management personnel and equipment
Support	Specialized unit that may support equipment or refill breathing apparatus
Tanker	Air Tanker
Telecomm	Telecommunications
Trainee	Field Graduate Trainee
Training	Training Officer
Transport	Bulldozer Transport
Truck	Any apparatus outfitted with aerial ladders, snorkel, telesquirt, etc.
Utility	Utility and recon vehicle or stake side
VLAT	Airtanker with a retardant capacity of 5000 gallons or more
Water Tender	Water tank truck, 1000 gal minimum
